

Light, wholesome and healthy,
straight from the heart of nature

**Quality
is a
way of life**

Bringing all the wholesome goodness of the earth into both kitchens and livestock farms.

AGRICOLA GRAINS has created a processing and extrusion system that allows us to obtain mechanically cold-pressed organic vegetable oils for both animal feed and human consumption, with excellent nutritional and organoleptic properties.

Specifically, the company specialises in the production of:

- organic crude-filtered high oleic sunflower oil
- organic refined high oleic sunflower oil
- organic crude-filtered linoleic sunflower oil
- organic refined linoleic sunflower oil
- organic crude-filtered soybean oil
- organic crude-filtered rapeseed oil.

AGRICOLA GRAINS is a strong, well-established business that harvests, processes and sells cereals and oilseed crops, all strictly organic. The company also produces vegetable oils for human and animal consumption, and its qualified staff provide technical assistance to the 1500 farming businesses AGRICOLA GRAINS works with, aided by an ACCREDIA-certified in-house laboratory for product analysis..

Each stage of the growing, harvesting and distribution process is tested in compliance with stringent international certification regulations, to guarantee products are 100% natural and of the highest quality. This quality derives from the conviction that a profound link with the earth and its values is the only road towards a sustainable present and a virtuous future, in which the company exports top-quality Italian organic product worldwide and distributes selected raw materials for livestock and human consumption

CRUDE-FILTERED HIGH OLEIC SUNFLOWER OIL

Extremely rich in **vitamin E** and **plant steroids**, it contains **vitamins A, C and D**. The high oleic acid content makes the sunflower oil more stable at high temperatures than the ordinary (linoleic) variety.

REFINED HIGH OLEIC SUNFLOWER OIL

Obtained using an extracting and refining process, this oil is transparent, with a slightly amber colour, and has a **high oleic acid content**. It is **ideal for cooking and frying**, for lighter, healthier dishes.

CRUDE-FILTERED LINOLEIC SUNFLOWER OIL

High oleic acid sunflower seed oil is composed of **20% oleic acid, and 55% linoleic acid**. Linoleic Oil has a different fatty acid composition from High Oleic Oil.

REFINED LINOLEIC SUNFLOWER OIL

Obtained using an extracting and refining process, it is **rich in linoleic acid (omega-6)** and **polyunsaturates and has a low saturated fat content**. **Vitamin E**, well known for its **antioxidant properties**, is present in high quantities. These characteristics make this **light oil** suitable for **light, raw dressings** or as an ingredient in all kinds of recipes that do not require extreme heat treatments.

ORGANIC CRUDE-FILTERED SOYBEAN OIL

This oil is extremely rich in polyunsaturated fatty acids, linoleic acid and alpha-linolenic acid. Maintains a fair amount of lecithin: high **omega-3** content, which, together with the high omega-6 and oleic acid content, gives the soybean oil significant **cholesterol-lowering properties**.

ORGANIC CRUDE-FILTERED RAPESEED OIL

Oil with a low **erucic acid** content, used as a condiment, for cooking and as an ingredient in margarine and shortening. High smoke point, thanks to the high **oleic acid** content. The acidity profile **can have a positive impact on the prevention of cardiovascular disease**.

Traceability and food safety guaranteed

Quality, Traceability and Responsibility. These are the hallmarks features of AGRICOLA GRAINS, an outstanding partner for Italian and European farmers, who share our founding principles: healthy farming practice and maximum food safety. The scrupulous analysis and quality control of incoming goods, conducted in our own in-house laboratory, the heat-recovery drying process, the infra-red toasting of the seeds, the extrusion and pressing using leading-edge technologies, the storage in carefully monitored silos, the delivery using certified freight carriers are all examples of the eco-sustainable, responsible choices we make right across the board. All this is part of a pact for quality between the company and our customers, strengthened over the years thanks to the values we share, such as safeguarding the land and guaranteeing healthy, wholesome food.
